

ANDRE NATHANIEL S. BARBASA

Software Developer

Iloilo City, Philippines | 09509138281 | dreisbetter@gmail.com | github.com/AndreNathanielBarbasa | linkedin.com/in/andrenathanielbarbasa/

PROFILE SUMMARY

Recent BSCS graduate with hands-on experience building and deploying real-world applications, from a production REST API handling 325 million records during OJT to full-stack projects using Python, PHP, and JavaScript. Comfortable across the stack, with particular strength in backend logic, databases, and API design. Quick learner, adaptable, and ready to contribute from day one.

WORK EXPERIENCE

Backend Developer Intern (OJT) — Eversun Software Philippines Corporation

Feb 2026 – Apr 2026

Iloilo City, Philippines (Remote)

- Built and deployed a production-grade REST API using Flask and PostgreSQL, handling a combined dataset of 325 million rows (Afternic marketplace listings + ICANN domain registry).
- Implemented PostgreSQL trigram indexing (pg_trgm) to optimize fuzzy and full-text search performance at scale.
- Designed paginated search endpoints and a single-query domain lookup using SQL window functions.
- Deployed and managed the application on a Linux server via SSH/PuTTY.

PROJECTS

AI Health Chatbot

Python · Flask · Groq API

- Built and deployed a Flask-based health assistant web app integrating the Groq API, using PostgreSQL in production and MySQL/phpMyAdmin for local development; deployed live on Render.

Community Alert & Notification System

Java · Sockets · Multithreading

- Developed a multithreaded Java TCP server for concurrent client connections and alert broadcasting. Built a Java Swing admin console for server management and live connection monitoring.

Fitness Tracking Web App

Python · FastAPI · Docker

- Built a fitness tracking backend with FastAPI and Pydantic for data validation; containerized the application using Docker and Docker Compose.

EDUCATION

Bachelor of Science in Computer Science

2022 – 2026

Iloilo Science and Technology University · Iloilo City, Philippines

CERTIFICATIONS

- Wadhvani Foundation — Ignite Philippines (Certificate, January 2026)
- Machine Learning — DataCamp (Course Completed, April 2024)
- Microsoft Cybersecurity Course: Security, Compliance, and Identity Fundamentals — TESDA (Certificate, June 2026)

SKILLS

Languages: Python, PHP, SQL, Java, JavaScript

Backend & Frameworks: Flask, FastAPI, REST API Design, Pydantic, Socket Programming, Multithreading

Databases: PostgreSQL, MySQL

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS

Tools & Platforms: Git, GitHub, Docker, Linux, XAMPP, Render, Laragon

LANGUAGES

Filipino — Native

English — Conversational / Working proficiency
